

Introduction

The use of this website is governed by this disclaimer. By agreeing to view this website or use any material or information contained therein, you are accepting the terms set out in this disclaimer, without any form of reservation.

This website has been prepared in accordance with legal requirements and to the extent necessary, no person should act upon any recommendation in this website without first obtaining professional investment advice.

No Offer

CIX100 Token is a utility token. CIX100 Token is not intended for sale or use in any jurisdiction where sale or use of digital tokens may be restricted or prohibited. CIX100 Token confers only the rights specifically described in our White Paper. CIX100 Token confers no other rights, including but not limited to any ownership, distribution (including but not limited to profit), redemption, liquidation, proprietary (including all forms of intellectual property), or other financial or legal rights. CIX100 Token is not a digital currency, security, commodity, or any other kind of financial instrument and has not been registered under the Securities Act, the securities laws of any state of the United States of America or the securities laws of any other country, including the securities laws of any jurisdiction in which a potential token holder is a resident. CIX100 Token cannot be used for any purposes other than those provided in the White Paper, including but not limited to, any investment, speculative or other financial purposes.

Any information published on this website is supplied solely for information purposes and should not be considered as an offer, solicitation or recommendation for the purchase or sale of, particularly in any jurisdiction where such offer or distribution is not authorised. The information contained within this website does not constitute investment advice and should not be relied upon to make any investment decision. Furthermore, information contained within this website should not be considered as a consultation of any nature, including consultation about legal or fiscal matters.

It is the responsibility of any person who accesses the information contained in this website to observe all applicable laws and regulations of their jurisdiction.

Forward-Looking Statements

This website and publications concerning Cryptoindex and CIX100 may contain projections and other forward-looking statements regarding future events or future financial performance. All statements other than present and historical facts and conditions contained in this website and in such releases, including any statements regarding future results of operations and financial positions, business strategy, plans and objectives for future operations, are forward-looking statements. These statements are only predictions and reflect current beliefs and expectations with respect to future events and are based on assumptions and subject to risk and uncertainties and subject to change at any time. Cryptoindex operates in a very competitive and rapidly changing environment. New risks emerge from time to time. Given these risks and uncertainties, you should not place undue reliance on these forward-looking

statements. Actual events or results may differ materially from those contained in the projections or forward-looking statements.

No Investment Advice

The information contained on this website shall not constitute investment advice. Any investment decision made will need to be based exclusively on an independent assessment on the basis of your financial position and investment objectives, as well as your personal interpretation of the information published on this website. Therefore, prior to making any investment decision, you may wish to consult your financial adviser, stockbroker, accountant, banker, lawyer or other professional adviser.

No Market

There is presently no market for the CIX100 Tokens and it is possible that such market may not arise, or be liquid enough, in the future, due to various circumstances, including, among other, limited transferability of rights conferred by the CIX100 Token.

No Guarantees

Whilst all reasonable steps have been taken by Cryptoindex to ensure accuracy of the information provided, Cryptoindex shall not be liable for any errors or omissions published on this website. The information contained in this website shall be for information purposes only and as such shall not to be relied upon by any person. No representation or warranty, whether express or implied, is made, and no liability whatsoever is accepted in relation thereto.

In addition, we do not represent or warrant that the website will be available at all times or that it will meet your requirements, that access will be uninterrupted, that there will be no delays, failures, errors or omissions or loss of transmitted information, that no viruses or other contaminating or destructive properties will be transmitted or that no damage will occur to your computer system. It is your sole responsibility to ensure adequate protection and back up of data and/or equipment and for undertaking reasonable and appropriate precautions to scan for computer viruses or other destructive properties.

Risk Factors

Below is a description of certain risk factors that are inherent to CIX100, the Cryptoindex, the market that it operates in generally, and us in particular. This description is not exhaustive and other unforeseen risks may materialize.

Risks Associated with the Ethereum Protocol

Because CIX100 is based on the Ethereum protocol, any malfunction, breakdown, or abandonment of the Ethereum protocol may have a material adverse effect on the platform or CIX100. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to CIX100, including the utility of the CIX100 for obtaining services, by rendering ineffective the cryptographic consensus mechanism that underpins the Ethereum protocol. Smart contracts concepts, the underlying software

application and software platform (i.e. the Ethereum blockchain) are still in an early development stage and unproven. There is no warranty or assurance that the process for creating CIX100 will be uninterrupted or error-free and there is an inherent risk that the software could contain defects, weaknesses, vulnerabilities, viruses or bugs causing, inter alia, the complete loss of your cryptocurrency contributions and/or CIX100.

Risk of Mining Attacks

As with other decentralized cryptographic tokens based on the Ethereum protocol, CIX100 are susceptible to attacks by miners in the course of validating CIX100 transactions on the Ethereum blockchain, including, but not limited to, double-spend attacks, majority mining power attacks, and selfish-mining attacks. Any successful attacks present a risk to CIX100, including, but not limited to, accurate execution and recording of transactions involving CIX100.

Risk of Hacking, Security Weaknesses, and Theft of CIX100

Hackers or other malicious groups or organizations may attempt to interfere with the website or CIX100 in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, because the platform is based on open-source software, there is a risk that a third party or a member of company technology team may intentionally or unintentionally introduce weaknesses into the core infrastructure of the platform, which could negatively affect CIX100, including the utility of CIX100 for obtaining Services.

Notwithstanding any security measures, there is no assurance that there will be no theft of the cryptocurrencies as a result of hacks, sophisticated cyber-attacks, distributed denials of service or errors, vulnerabilities or defects on the website, on the Ethereum blockchain or any other blockchain, or otherwise. Such events may include, for example, flaws in programming or source code leading to exploitation or abuse thereof. As such, distributed CIX100 may hold little worth or value and this would impact their trading price.

Risk of Unpermissioned, Decentralized and Autonomous Ledger

The Cryptoindex project is being developed in connection with various distributed ledger systems including, but not limited to, Ethereum, which are unpermissioned protocols that could be accessed and used by anyone. The utility and integrity of the project relies on the stability, security and popularity of these decentralized ledgers. The project is envisaged to be an open, decentralized community and its composition can include users, supporters, developers, Token holders and other participants worldwide who may or may not be connected with us in any manner. Given the diversity of the underlying technologies, the Cryptoindex project is intended to be decentralized and autonomous in nature as far as its maintenance, governance and evolution are concerned.

Risk of Weaknesses or Exploitable Breakthroughs in the Field of Cryptography

Cryptography is evolving and there can be no guarantee of security at all times. Advancement in cryptography technologies and techniques, including, but not limited to, code cracking, the development of artificial intelligence and/or quantum computers, could be identified as risks

to all cryptography-based systems. Adverse outcomes such as theft, loss, disappearance, destruction, devaluation or other compromises may result. The security of the CIX100 cannot be guaranteed as the future of cryptography or security innovations is unpredictable.

Risk of Failure of Project

There is no reasonable expectation of benefits to be conferred by CIX100.

The flawlessness of the source codes cannot be guaranteed. They may contain bugs, defects, inconsistencies, flaws or errors, which may disable some functionality, create vulnerabilities or cause instability. Such flaws may compromise the predictability, usability, stability, and/or security of the Cryptoindex project in general. Open source codes rely on transparency to promote community-sourced identification and solution of problems within the code.

Our software development effort could face difficulties from time to time that may be unforeseeable and/or unresolvable. Accordingly, the development of CIX100 could fail, terminate or be delayed at any time for any reason, including due to lack of funds. Development failure or termination may render the CIX100 untransferable, of reduced or no utility or value, and/or obsolete.

Risks Associated with Uncertain Regulations and Enforcement Actions

The regulatory status of Cryptoindex and distributed ledger technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether regulatory agencies may apply existing regulation with respect to such technology and its applications. It is likewise difficult to predict how or whether legislatures or regulatory agencies may implement changes to law and regulation affecting distributed ledger technology and cryptocurrencies, and its applications. Regulatory actions could negatively impact us in various ways. We may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction. This may impact the appeal or practicality or functionality of the anticipated CIX100. We may also have to cease operations in a jurisdiction that makes it illegal to operate in such jurisdiction, or make it commercially unviable or undesirable to obtain the necessary regulatory approval (s) to operate in such jurisdiction. In scenarios such as the foregoing, the utility, liquidity, and/or trading price of CIX100 will be adversely affected and/or CIX100 may cease to be traded. CIX100 may also have to be refunded to our affected participants.

Crypto-tokens have been the subject of scrutiny by various regulatory authorities and may be overseen by the legal and regulatory authorities of a number of jurisdictions globally. Our functioning generally could be impacted by one or more regulatory inquiries or actions, including, but not limited to, restrictions on the use or possession of digital tokens like CIX100.

Website Updates

The information contained on this website is subject to material updating, revision and amendments. Materials should only be considered current as of the date of initial publication appearing thereon, without regard to the date on which you may access the information. Any

links to third party websites which may be provided on the website have only been placed on this site for the convenience of the viewer and Cryptoindex does not operate or control in any respect any information, opinions, recommendations, products or services on such third party websites. Cryptoindex shall not be responsible for the privacy policy of any third party websites.

Cryptoindex maintains the right to delete or modify information contained on this website without prior notice.

No Reproduction of Website's Contents

Any information contained on the website may not be reproduced, reworded or copied whether in whole or in part, without the prior written consent of Cryptoindex.

Liability

Cryptoindex, its directors, managers, employees, agents and shareholders, as well as any third party who may supply information and the third party's directors, managers, employees, agents and shareholders, disclaim any liability for any losses and/or damages, direct or indirect of any nature, arising from the access to this website.

Privacy

We process personal data in accordance with our obligations at law and our *privacy policy*.

Governing Law

The terms of use of this website are governed by and shall be interpreted in accordance with the laws of Malta and the Courts of Malta shall have exclusive jurisdiction for the resolution of any dispute in relation to the interpretation, application, or execution of these clauses and/or the use of this website.
